

Year 10 A Music

OVERVIEW

Each student is offered small group lessons on an instrument of their choice. In class, after beginning with percussive group playing and reading rhythmic notation, the focus moves to learning and playing the Ukulele as a whole class, which then culminates in an end of term performance. In second term an exploration of genre is undertaken, with smaller groups being formed based on personal style preference, and repertoire chosen based on instrumental representation in each group.

Basic technical skills are acquired through learning about setting up small PA systems and lead maintenance. Composition is explored through the writing of a group song using brainstorming techniques and exploring metaphor in poetry and song.

ASSESSMENT

A range of informal assessment includes practical tasks and observation. Throughout the year, students will have the opportunity to demonstrate their learning both individually and collaboratively.

SUBJECT PREREQUISITES

There are no prerequisites for this subject.
